VOLUNTEERING

OPERATION CODE · Front End Engineer

Remote

May 2019 to Current

Front-end contributor of non-profit working to get veterans into the tech industry.

PROJECTS

OPERATION CODE PODCAST PAGE

- Built a podcast page for Operation Code's podcast page using React
- Includes Card component that lists each individual podcast episode
- User is able to play each individual episode with React Player
- Includes media queries to determine the viewer's display dimensions and a responsive, grid-based user interface to provide an optimized look for various viewing device display sizes.
- Languages & libraries: React, React Player

BREW JAMS

- Built a snazzy music player web app perfect to start your mornings with
- Includes splashy landing page, an album collection page, and an album page from which a user can play music and skip between songs.
- Includes media queries to determine the viewer's display dimensions and a responsive, grid-based user interface to provide an optimized look for various viewing device display sizes.
- **Languages & libraries:** HTML, CSS, JavaScript, jQuery, Buzz audio library, AngularJS

WEEKLY AGENDA

- Built a self destructing to do application
- It allows users to create a free account, sign in, and make to-do lists that clear items out for you after a week so they don't get too cluttered
- **Languages & Frameworks:** Ruby on Rails and Bootstrap

SHAREIT

- A simple community discussion site with a responsive design. Features include multiple user role/permission levels, topic areas, posts, comments, favoriting of posts, and up or down -voting of posts (essentially expressing 'liking' or 'disliking' of posts).
- **Languages & Frameworks:** Ruby on Rails and Bootstrap
